

ZACK DE BOER

(431) 887-7481 | zackdb2005@gmail.com | github.com/zdeboer

PROFESSIONAL SUMMARY

Full-stack developer with a focus on backend systems, data pipelines, and AI integration. Led development of a production examination platform, delivering it in 8 weeks against a 16-week estimate. Comfortable working across the stack, from parsing and structuring raw data to building the APIs and UI that serve it.

TECHNICAL SKILLS

Languages & Scripting: Python (data manipulation, file I/O, automation), JavaScript, Java, SQL, PHP, Ruby, HTML5/CSS3; familiar with C#/.NET

Frameworks & Architecture: Node.js, React, REST APIs, MySQL, Docker (basic), Linux/Shell environments

Core Competencies: AI integration & API infrastructure, structured data parsing (JSON/binary), OOP, data pipeline optimization, Agile/Scrum leadership, technical documentation

TECHNICAL PROJECTS

- Software Developer — ACE Project Space

2026

 - AI Integration:** Built a full-stack English examination platform that uses AI models to automatically grade reading and listening comprehension responses.
 - Timeline:** Took the project from scope to production in 8 weeks, against a 16-week estimate.
 - Data Pipeline:** Structured and cleaned datasets of ethical/societal discussion topics, then fed them into AI models in a format that kept outputs consistent and repeatable.
 - Backend Logic:** Handled asynchronous AI API calls, application state, and validation of AI responses before they reached the frontend.
- Music Organizing & Relational Data App

Academic

 - Database Design:** Built a full-stack web app with a relational MySQL schema to catalog and search a music collection.
 - API Design:** Built REST APIs to filter and serve data to the frontend.
 - Frontend:** Designed the user flow, wireframes, and reusable UI components.

EDUCATION

- Red River College Polytechnic — Exchange District Campus

2025 – 2026

 - Currently enrolled in Full Stack Web Development
 - Relevant Coursework:** Advanced JavaScript, API Design, SQL & Database Management, Cloud Basics, Systems Analysis, Agile Software Development
- Murdoch MacKay Collegiate

2023

 - Completion of Grade 12

EXPERIENCE

- Academic & Collaborative Projects

2024 – Present

 - Worked in Agile sprints to design, build, and iterate on full-stack features.
 - Reviewed teammates' code for efficiency and consistency with the codebase.
 - Wrote database schemas, user stories, and acceptance criteria for team projects.
- Customer Service & Seasonal Roles — Various Employers

2017 – 2024

 - Communicated clearly with customers and coworkers under time pressure.
 - Picked up new tools and processes quickly across a range of jobs and teams.
 - Built a consistent track record of reliability across every role.
